

DRIFT COOLER STAND

Assemble each unit individually using only parts supplied in this box

Assembly Instructions

Included in the Box

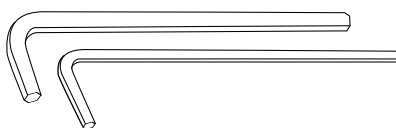

2 x 5mm Bolts

2 x Spring Washers

1 x Grub Screw

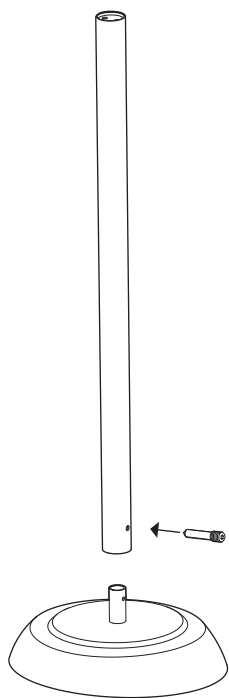

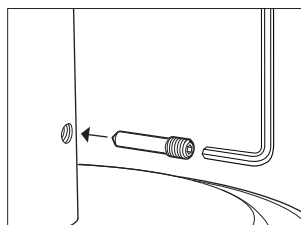

5mm and 2mm Hex Keys

a)

Remove all parts from their plastic bags.

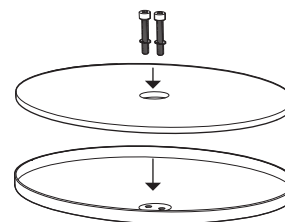

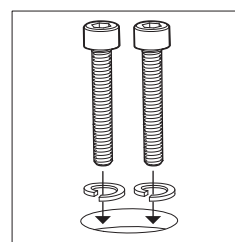

Place the top dish flat on a level surface. Slot the pole over the post and align the grub screw holes. Tighten the grub screw clockwise using the 2mm hex key provided.

b)

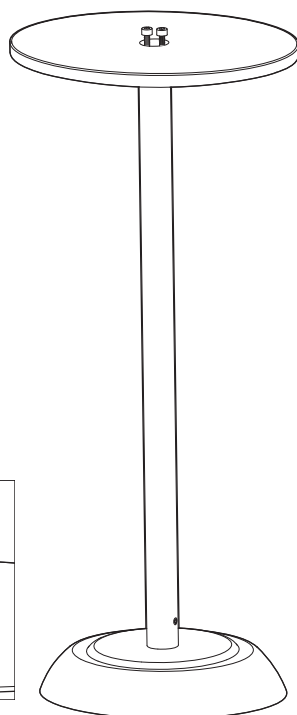

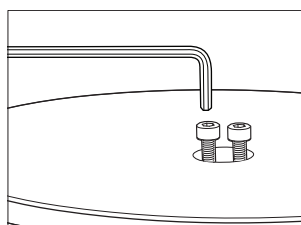

Place the black weight into the stainless steel base with the small post facing inwards.

Ensure the spring washers are on the bolts. Place the bolts through the bottom of the weight and out of the stainless steel base. Hold the bolts in position.

c)

Keep the top dish and pole flat on a level surface. Place the weighted base on top of the pole and align the bolts with the corresponding holes in the post. Securely tighten each screw clockwise using the 5mm hex key provided.

d)

Turn the stand over onto its base.

Keep the Hex key set to tighten if necessary.
